

FOREIGN AUDIT SERVICES

Auditing in a foreign location can be an especially complicated procedure. Inevitable delays and unexpected problems can eat up time and add to costs, decreasing efficiency and possibly accuracy. Differences in language, legal and regulatory requirements, accounting procedures, business practices, and social customs can create barriers that interfere with the normal process of completing an audit.

Why risk thousand of dollars and hours of travel only to discover these barriers make your job more difficult, if not impossible?

PRI Audit & Control (PRI) offers an alternative to auditing a foreign operation by yourself. With an English speaking staff of specially trained auditors and accountants based in the United States, Europe, Mexico, Middle East and Pacific Rim, **PRI** can provide you with audit professionals who are knowledgeable of local languages, currencies and cultures. In many cases, they will be natives or long-time residents of the country. **PRI** Also provides internal audit services to companies located in South America and Africa.

Our international internal auditors are multi-lingual, frequently fluent in three or more languages and many have worked for U.S. based public accounting firms. Many have undergraduate accounting or economic degrees from U.S. and European universities. All have extensive accounting and auditing experience in a variety of industries.

Whether your operation is in Europe, Latin or South America, or the Pacific Rim, **PRI** can provide multi-lingual internal auditors prepared to entirely handle or to provide assistance with internal audits, computer control and security audits, dollar recovery audits, franchisee audits, fraud investigations and other specialty audits.

Call **317-573-1600** the next time you are faced with a foreign audit, and leave the auditing to us.

PRI AUDIT & CONTROL is a full-service professional internal auditing firm with experience and expertise in all areas of internal audit.
